

Site Reliability Engineer

We are looking for a Site Reliability Engineer to join our Cloud Engineering team.

This role is perfect for an early-career engineer eager to gain hands-on experience in building, operating, and improving cloud infrastructure, container platforms, and delivery pipelines in a live production environment.

You will work closely with engineers to help operate, improve, and secure cloud platforms while learning best practices in reliability, automation, and operational excellence.

Key Responsibilities

Cloud Infrastructure & Platforms

- Support and maintain cloud infrastructure and services.
- Help operate and manage containerized platforms and workloads.
- Contribute to infrastructure changes using **Infrastructure as Code**
- Apply best practices for **availability, security, and cost efficiency**

Reliability, Operations & Delivery

- Assist with monitoring, alerting, and operational dashboards
- Participate in incident response and on-call rotations with guidance
- Support troubleshooting, root cause analysis, and operational improvements
- Help automate repetitive operational tasks to reduce manual effort
- Support CI/CD pipelines and deployment workflows
- Assist with application releases, rollbacks, and reliability improvements
- Collaborate with engineering teams to improve delivery and operational stability

Requirements

Required

- 1–2 years of experience (or equivalent practical exposure) in Cloud, DevOps, SRE, or Platform Engineering
- Familiarity with cloud platforms and container technologies
- Exposure to **Infrastructure as Code**, CI/CD, or automation tools
- Basic scripting skills (Python or Bash)
- Understanding of operational best practices, including **secure configurations**
- Strong problem-solving skills and willingness to learn
- Good communication and collaboration skills

Nice to Have

- Experience with Kubernetes or container orchestration
- Familiarity with deployment workflows and release processes
- Exposure to monitoring, logging, or incident response practices
- Basic understanding of cloud security principles (e.g., access control, secrets management)
